

For all the “*Rite*” Loading Dock Solutions

## FSF Stay Open Fire Door

*All-Rite offers a wide variety of state-of-the-art fire doors to suit any type of installation. Our fire doors are designed to withstand frequent testing without subjecting any parts to impact -- they are designed to last !!*

*Our FSF Stay Open Fire Doors are made in Canada, for Canadian conditions. They feature ease of installation and resetting, years of trouble-free operation, and the best value for the price.*

### Advantages:

- Made in Canada for Canadian conditions
- Rugged 2” curved slats
- G90 galvanized finish that needs no further painting
- Structural angle guides and bottom bar are prime-painted
- Fluid governor for smooth quiet operation
- Galvanized hood can be supplied prime-painted at extra cost
- Steel plate brackets are more durable than stamped steel bracket plates
- An economical alternative when a fire door is required to close only during testing or in the event of a fire
- Resetting is simple and can be performed by one technician, since the main spring does not require adjusting.

### Standard Features:

- 2C curved slat curtain, 22ga.
- G90 galvanized finish
- Structural angle guides and bottom bar
- ¼” thick steel bracket plates
- Cast Iron Stops
- 1 Year Warranty

### Options:

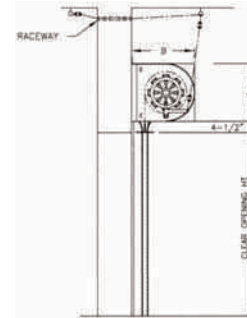

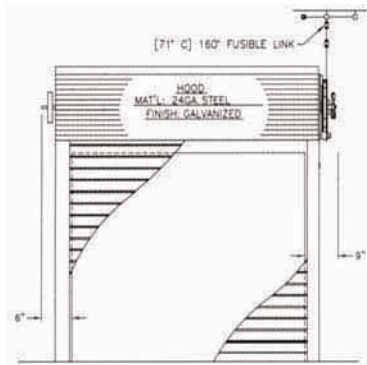

- Firefly II release
- Firefly II Plus with battery backup

### Benefits:

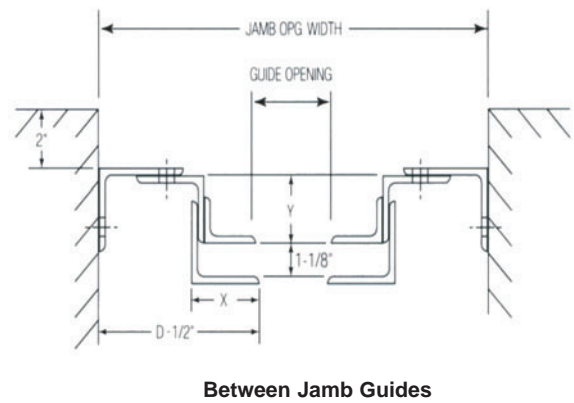

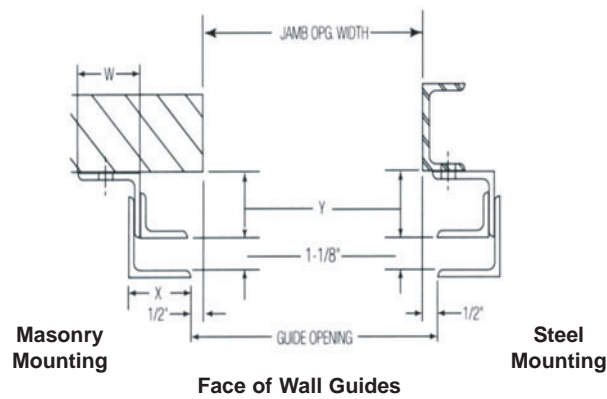

- Ease of installation
- Assures years of trouble-free operation
- Best value for the price
