

LET IT RAIN!

SAFER working environment & reduced cargo damage or contamination

SELF ADJUSTING sealing for a variety of truck & trailer heights

REINFORCED with Fibreglass stays allows a non-mechanical function

Stops Rain From Pouring Off The Trailer Roof Into The Loading Dock Area.

Super Seal's exclusive Rain Deflector is part of a complete solution for keeping loading docks dry in inclement weather. As a truck reverses towards the loading dock, the Rain Deflector swings up forming a seal to the top of the trailer. The Rain Deflector forms an excellent seal from the dock across the trailer roof, thus directing the rain off to the trailer sides and not into the loading dock area. Exceptionally effective where declining driveway approaches increase water flow towards the dock area, Super Seal's exclusive Rain Deflector stops rain, sleet and melting snow in its tracks. The result is a safer, more comfortable and more productive working environment with reduced cargo damage or contamination.

Rain Deflector Product Details:

Available in three models the RD-10, RD-11 and the RD-12 Rain Deflectors, can also be used in conjunction with a dock seal. Designed and manufactured using high quality materials, the Rain Deflector is the most effective and most durable rain diverting system on the market today.

- Can be used with or without a dock seal.
(If dock seal is already in place, the Rain Deflector must fit around the outside of the seal.)
- The Rain Deflector has a standard unit projection of 34" and a standard header curtain drop of 36"
- Impact ends are reinforced with PVC coated and impregnated material made of woven multifilament polyester.
- Wood frame with steel cover and galvanized steel side supports.
- Head curtain is made of flexible SS90-1 high performance vinyl with fibreglass stays and high density foam pad.
- Quick and easy installation.
- Galvanized mounting hardware supplied

As a trailer moves back,

the Rain Deflector swings up providing a seal to the top of the trailer
